SARCOMA CANCER AWARENESS MONTH

— JULY —

Sarcoma Awareness Month shines a spotlight on a rare group of cancers that form in bones and soft tissues. Though sarcoma makes up just 1% of adult cancers, its impact is significant—and early detection is vital.

Why This Month Matters

Sarcomas are often hard to diagnose and can affect people of any age, including children. Many people have never heard of sarcoma until it touches their lives. This month is about raising awareness, supporting research, and ensuring no one faces sarcoma alone.

How You Can Help

- Learn the Signs: Unexplained lumps, swelling, or persistent pain? Get it checked.
- Spread Awareness: Talk about sarcoma. Share information. Break the silence.
- Support Research: Donations and advocacy help improve treatment options and survival rates.
- Wear Yellow: Show support by wearing yellow throughout July.

Together, We Make a Difference

Let's raise our voices for those affected by sarcoma. Awareness saves lives.
